

Shoot stills and 360's just like a pro

Your in-house PC controlled photo studio

Our system lets you shoot like a professional, cut costs and deliver exciting images to increase your online sales and improve communication.

Patented Worldwide

emeDigital

Photostudios

Owning one of our studios is like having a professional photographer on your staff. The controlled lighting environment inside the studio yields images that are perfect for your website or print. The camera and lights are all controlled by the PC software, allowing rapid workflow and consistency.

Create product shots for websites and product catalogues.

Effective supply chain communication.

Medical, research & evidence photography.

Quality Control.

Image database creation.

Instant image eMail.

Large Box System

For products up to 51cm in any dimension, down to as small as you like. Shoot overheads or side shots. Incredibly versatile, straightforward to use and reliable.

Small Box System

For products up to 38cm in any dimension. Ideal for smaller items. As flexible as its larger sibling, with the added benefit of selectable lighting to provide a greater range of illumination options.

For technical specifications, compatible cameras, operating systems and PC requirements, please visit www.emedigital.co.uk

360° Studio Systems

Animated shots attract attention and provide more information to the viewer. We provide four sizes of automated turntable for creating 360-degree product shots for websites and business communication.

Each turntable is provided with image creation software that works in unison with a compatible camera. The software controls turntable movement, camera settings, picture taking and processing so automating image capture and stitching.

Titan Turntable

Drives up to 227Kg/500lb

360 Model Turntable

Drives up to 90Kg/200lb

360 Mannequin Turntable

Drives up to 45Kg/100lb

360 Turntable

Drives up to 11Kg/25lb

360 Lighting

We provide a range of kits to facilitate the creation of 360 images with white backgrounds,.

Photostudio Multi

Create Hemispherical or Orbital images that your customer can drag to view your product from every angle.

Zoomable Orbital Images

Not only can browsers spin these images in every direction but can zoom in as well, thus seeing all the detail. These images can be labelled to explain the features of the product. For example, we can produce an image of a mobile phone spinning on its axis with the functionality of every connection and button explained.

Cutout Service

Save yourself time and money. If you have images that you normally pay a designer to cut out, send them to us instead. We offer fast turnaround at an amazingly low price per image.

Our Clients

Include: L' Oreal, Jimmy Choo, Selfridges, Hallmark Cards, Datamonitor and Heinz, to name but a few.

Next steps:

Call us to arrange a live demonstration

Bring your products along to us and we can show you how powerful yet simple the system is to use. Alternatively you can:

Arrange a Live Webcam demonstration. Via the internet, to your computer.

Send us an item. We will do one demonstration shot and show you the results.
