

## Electronic Cheque Processing: Remote Capture and Deposit

If you receive high volumes of US cheques, here is an opportunity to lower costs, speed access to funds and reduce environmental impact.

### Your one-stop global payment solution

Clear cheques,  
credit cards,  
postal orders,  
direct debits,  
bank transfers  
and more  
through a single  
client account  
at PacNet.

*With PacNet's ARC Cheque Conversion solutions starting as low as £0.08 per item, you will save money over depositing cheques directly through the banks.*

*Using a cheque scanner provided by PacNet, cheques are quickly and conveniently converted to electronic payment files which can be securely uploaded from your office for deposit. You will receive same day credit, with returns acknowledged quickly, usually within 3 days.*

*Companies from around the world can use this service. No US bank account is required. No matter where you operate, funds are available to you on the next business day by wire transfer to the account you designate.*

**Remote and Distributed Capture** – Allows your organisation to receive paper cheques at one or multiple locations, convert them into electronic cheque files, then deposit electronically to a single account.

**Automatic Data Conversion** – The scanner automatically captures chequeing account information and a perfect image of each item. You have the option of populating other data fields quickly and easily using compatible barcode scanners.

**Electronic Remote Deposit** – Allows you to reduce fuel costs and environmental impact; no more photocopying cheques, driving deposits to the bank, or completing volumes of paperwork.

### The benefits are clear:

- **Speed of handling** - You will be able to capture up to 80 cheques per minute and deposit batches of cheques in seconds without shipping, without going to the bank, and without standing in line.
- **Reduced transport costs** - Transmitting files of cheque information eliminates the need to drive or ship paper documents to their destination.
- **Accuracy** - As each cheque is scanned, an image appears on the screen for verification and you can keep a running total. Mistakes, if they happen, are easy to correct without starting again.
- **Speed of payment** - PacNet credits your account on the same business day for valid cheque files. If a cheque is dishonored, you will receive immediate notification instead of waiting 7 to 10 days for the return of paper items.

- **Security** - Paper cheques are non-replaceable documents. If they are lost, stolen, or destroyed, they are often impossible to recover. Keep copies of the images as backup instead.
- **Fewer dishonored payments** - You may electronically represent each cheque that is returned for reason of insufficient funds.
- **Simplified accounting** - PacNet's detailed reports and timely information speeds reconciliation time.
- **Improved constituent relations** - Quickly access individual cheque information should queries arise. Instantly quote the cheque number, amount, and payment date to customers, or send them a clear copy of the item for their reference.

#### **How it works:**

Your office receives cheques in the post from customers or donors. Your staff opens the post and removes cheques, loading all payments into the scanner. The scanner user interface shows your operator a clear image of each cheque as it is captured by the system. Additional information can be captured manually or by barcode scanner to add to each payment file.

As soon as your operator is finished scanning cheques, making a deposit is easy. Simply submit the file for payment using PacNet's RAVEN Online payment gateway.

#### **Do you need a full-service lockbox solution?**

Work with one of PacNet's reputable partners for setup of post box addresses, post opening, data capture, and submission of payment files to PacNet. Our streamlined services cost less than employing in-house post management and donation processing staff.

#### **Are you a vendor to the Direct Response Industry?**

Partner with PacNet to offer your clients end-to-end solutions including state of the art, affordable, and efficient transaction processing services. PacNet Services offers multiple integration options, technical support, white label products, and co-marketing for credit card processing, cheque processing, direct debit, bank transfer collection and more.
