

Matchcode Data Capture

Matchcode Data Capture (DC) is a new user customisable data capture product from Capscan. The program has been specifically developed to provide all the necessary core functionality but with a simpler 'look and feel' that makes the program more intuitive to use.

With Matchcode DC, you simply enter a postcode or partial address and it returns a full and valid address including the organisation name. Matchcode DC also allows you to tailor the user-interface and adjust various settings to suit your needs or preferences. You can easily change font sizes, Window Pane views and paste settings through the menu options. Matchcode DC can be easily integrated into any call centre software application or electronic form. It comes supplied with the Postcode Address File (PAF) and other optional data sets.

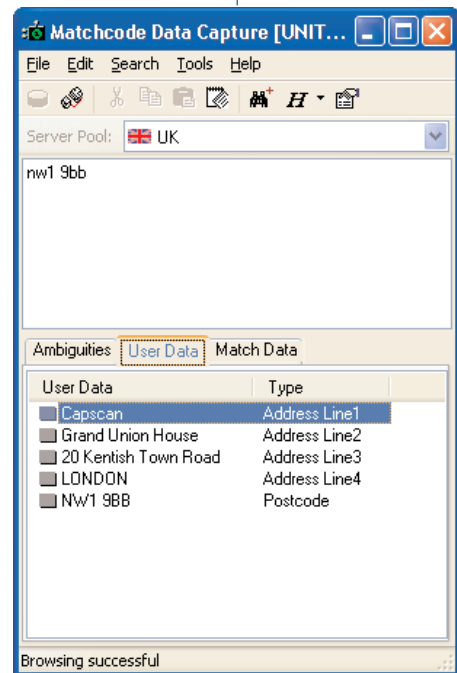

FEATURES AND BENEFITS

Matchcode DC:

- Contains a new simplified, user-friendly Windows interface.
- Contains a customisable graphical user interface (GUI) that allows the user to blend in and out features such as the toolbar, a status bar and the Relevant Codes Database (RCDB) information (map co-ordinates, ward codes, health codes, etc).
- Provides a distance calculation facility that calculates the distance between geographical co-ordinates.
- Provides rapid address capture (postcode to address).
- Returns a full postal address from a partial address.
- Links with Names and Commercial Data Sets.
- Ensures consistent formatting of addresses for database storage and export.

TECHNICAL FEATURES

- Contains the Royal Mail Postcode Address File of 28 million addresses.
- Can be easily integrated into any electronic form or call-centre software as a 'Plug-and-Go'.
- Can be used as a DDE Server.
- Can operate in Client/Server mode.
- Available as an API for Webmasters.
- Supports UNIX, OS/390 and AS/400.
- Supports Client/Server architecture.
- Java, CGI, Active-X, ISAPI and XML versions available.

"The results of our tests showed that Capscan's search routines were not only faster but also better able to find complete addresses."
